# Trade Price List

OF

# BULBS

SOLD BY

# August Rölker & Sons,

136 & 138 W. 24th Street,

P. O. Station E,

New York.

# Read our Terms.

To Approved Accounts: Net Thirty Days from date of shipment, payable in New York funds; accounts not settled by the end of the month in which they fall due are subject to our sight draft without further notice, but with 25 cents added for exchange on New York.

Accounts over One Hundred Dollars may be settled by sixty days' note.

**Unknown Correspondents** must furnish satisfactory references, or enclose remittance on New York with order. As bulbs are perishable, we do not like to make C. O. D. shipments.

Ten per cent. Discount on all orders above One Dollar accompanied by cash, except on goods quoted as net. The same discount applies to approved accounts paid within ten days from date of invoice. Remittances are applied first to over-due accounts, before being entitled to the cash discount.

Orders are filled in rotation as they come in, and as long as our stocks last; when we are asked to buy in the market we charge a reasonable advance. Delivery from early in September forward; sorts marked † cannot be delivered until later in the Fall.

We ship sound Bulbs in prime average quality of each season's growth, judging from outward appearance. After leaving New York they travel at purchasers' risk. Claims, if any, must be made within 5 days after receipt of goods, as all can be seen within this time which we are expected to be able to see.

We do not assume any responsibility for the results in forcing and flowering of Bulbs or Seeds, as that is beyond our control. Should it, however, happen that, by some mistake of ours or of the shippers abroad, a wrong variety be delivered by us instead of the one ordered, and this be proved at the time of flowering, we shall then indemnify the purchaser to the extent of any difference in price existing between the respective bulbs in their dry state only, and as quoted in this catalogue; but under no circumstances do we agree to be charged with difference in the market value of the cut flowers when grown.

All orders given, either verbally or in writing, are understood as accepting all our above-stated terms.

Address all correspondence to P. O. Station E.

Respectfully,

# August Rölker & Sons,

136 & 138 W. 24th Street.

Autumn, 1893.

# August Rölker & Sons'

List of

# Selected Bulbs

From the Most Reliable Growers of Europe and America.

We furnish 6 bulbs of one variety at dozen rates; 25 at 100; 250 at 1,000 rates.

No Charge for Packing and Shipping, but postage will be charged on bulbs sent by mail, and we do not assume the risk of their safe arrival; to express is the safer way.

Send Plain Shipping Directions, as goods travel at purchaser's risk after leaving our store.

Remit by P. O. money order or check on New York. No goods sent C. O. D. without a proportionate deposit.

In Ordering named varieties state whether to substitute similar kinds when sold out. Parties not well acquainted with the different sorts will obtain better results by leaving the selection of their wants to us.

This list cancels all previous quotations. Prices are quoted for present stocks, and are subject to change without notice.

New York, August, 1893.

Our Motto is "QUALITY" or "The Best is the Cheapest."

# The Leading Sorts for Cut=Fower Growing.

# Roman Hyacinths.—Now Ready.

Can be brought into flower from Thanksgiving forward. Three or four grown in 6 inch pots, or six in an 8 inch seed pan, will show very ornamental when in flower, and will prove ready sellers to the stores for home decorations. Grown in flats of fifty, they are easily handled, stand without injury shifting to any suitable place in the greenhouse, thus being economical in room. Good bulbs will often produce two and more suitable flower spikes; and should prove a paying investment to the grower. Small bulbs are apt to disappoint, wherefore, we offer only the large sized ones.

# A-White-skin Romans-Single early, flowering pure white; the earliest kind.

In selected size	Per 1000 .\$24 00	Per 100 \$2 50	per doz. \$0 40
If bought by the original case of 2000	23 00		
In extra selected size	27 00	3 00	45

#### B-Red-skin Romans-The later kinds, force from February to Easter.

Single, blush white, stock limited	Per 100 . \$2 50	Per doz. \$0 40
Double, rosy white		35
Single blue	. 2 25	35

# Lily of the Valley.

Best German Forcing Pips-November delivery.

Since years this little bulb has been our specialty, and the large quantities we handle have enabled us to not only obtain the best terms but also to command the best quality. From the many endorsements we hold and from the repeated orders of large consumers all over this country we can say: No Valley Pips average better than ours, and if properly treated Rölker's Valleys are bound to give satisfaction. The size of pips differs with each season, but we warrant to deliver prime average quality of the season's growth. Our pips come packed in boxes of 2,500.

Please Note.—For earliest forcing it will pay to select only medium-sized and well-rooted even-running pips of pinkish not greenish hue, and to leave the others for later forcing, when they will respond well, whilst early they would prove a loss. Pot-growing of pips is

largely practiced in Germany and can be done to pay equally well in this country. 25 pips in a 6 inch pot will find ready buyers when in flower, and even inferior flowers will here help to heighten the general effect and not prove second class sellers. Avoid too much bottom heat in forcing which burns the roots and stops the growth. A gradual increase from 75° to 95° is advised, and plenty of water of tepid temperature. Sudden changes of bottom heat check the growth, therefore, when grown in flats, extra attention is required when shifting to increased temperature.

## Totus Albus or Paper White Narcissus.—Now Ready.

Can be forced to flower about two to three weeks earlier than the early Roman Hyacinth. Its pure white flowers of fine clove scent are much admired and nearly always find a ready market. This variety belongs to the Polyanthus tribe. Good bulbs produce one sometimes two flower spikes. We offer:

	Per.	1000	Per	100
The Old or Common Paper White	\$7	50	\$1	00
The Improved or Grandiflora kind	10	00	1	25

The latter excels by its larger flowers and flower-heads, but the former is a little earlier in forcing. Five bulbs to an 8 inch seed pan will make quite a show when in flower,

### Double Roman Narcissus.—Now Ready.

Are not as beautiful as the Paper Whites but a little earlier in flowering. Their flowers resemble the Chinese Narcissus (so-called Sacred Lilies) in general appearance.

The 1000 at \$10 00; the 100 at \$1 25.

#### Double Von Sion.

The well-known golden yellow Narcissus, known in England as Double Daffodills, has proved the most popular of all the forcing Narcissi. For cut flowers they are best grown in flats, but grown three in a six inch pot or six in an eight inch pan they are very effective when in flower, and have always proved a good seller to the stores for home decorations, especially during Lent time, as foreboders of Spring. Many small so-called flowering bulbs are offered at low prices; they are unreliable in forcing and are best used for the latest flowering in the frame or out-doors Good sized bulbs will force readily and produce repeatedly two flowers and more to the bulb. We offer in three sizes, as follows:

Ordinary so-called flowering size\$1	6 00	per 1000;	\$1	80 per	r 100	
Prime forcing size	50	6.6	2	00	6.6	
Extra selected	3 50	6.6	2	40	66	

## Double Incomparable Narcissus.

Also called Butter and Eggs, is a competitor of the foregoing in forcing, being nearly two weeks earlier; but in color it is not of as bright a yellow; its greater cheapness recommends it. We offer:

The 1000 at \$10 00; the 100 at \$1 25

It shows well when grown in pans; so does

## Single Bicolor Princeps Narcissus.

Of very refined appearance with its bright golden yellow trumpet, the surrounding petals nearly white, bearing mostly two flowers to the bulb, on stems of good height; forces readily for March. This bulb is certainly deserving of larger cultivation. True the Horsfieldi is grander, but by far more expensive and comes later. We offer fine bulbs.

The 1000 at \$18 00; the 100 at \$2 00

## Pœticus Ornatus Narcissus.

An earlier variety of the old Pheasants Eye without the disagreeable heavy fragrance of the latter. The price is now so cheap that it is bound to enter the line of popular forcing Narcissi, though it will hardly flower before latter part of March. We can offer a limited stock,

The 1000 at \$10 00; the 100 at \$1 25

## Freesia Refracta Alba Odorata.—Now Ready.

Also called the African Lily of the Valley. The graceful sprays set with six to eight fine white fragrant flowers show equally well when used as cut flower, as when grown in pots or pans, forming a luxuriant lasting bouquet. Grown cold they remain more dwarf and compact. A well-grown pan of Freesias will find ready buyers among the public, and can be produced at very moderate cost. Even very small bulbs of Freesias will produce fair flowers, but the larger bulbs are likely to produce more flowers in succession. Our selections are very liberally assorted as to size of bulb. We offer:

Good prime selected	\$7	50 per 1000;	\$1	00 per	100
Extra fine selected	.10	00 "	- 1	25 .	6
Leichtlinii, the yellowish variety	.10	00 "	1	25 6	6

# Gladiolus Colvillii Alba, "The Bride."-Fall Delivery.

For Spring flowering this bulb is largely employed in Europe; its pure white graceful spikes come out-doors fully four weeks ahead of the gandavensis kinds, and are a valuable contribution to the cut flower market when other white flowers are scarce. They are hardy but in severe climates need Winter covering. For forcing in pots it has thus far not been appreciated in our country, though this is done abroad on a very large scale and successfully, the bulbs, of Crocus size, often producing three to five spikes from 12 to 18 inches long. The treatment is that of Hyacinths. A special purchase enables us to offer a limited quantity very low so that a trial will involve only a small cash outlay. We offer:

The 1000 at \$5 00; the 100 at 75 cents.

## Lilium Candidum—The old St. Joseph's Lily. Now Ready.

Less reputed now than formerly, this Lily is still worthy of attention as a good flower for funeral work. The over cultivation by the French has reduced the size of the flowers to appear more like large Azaleas than Lilies, but the spikes when cut are a graceful ornament for vases, and the flowers have not that heavy headache scent of the Harrisii, objected to by many. For out-door growing and early Summer flowering our smallest size will answer. For forcing we recommend the larger sizes. We offer:

Smallest, for bedding out\$22	50	per 1000;	\$2	50 j	per 100
Good first size, for forcing	00	66	2	80	6.6
Extra selection	00	66	3	50	6.6

# Other Lilies, Hyacinths, Tulips, Etc.

See later chapters under respective headings.

# For Growing into Plants

As Easter and Home Decorations.

We call special attention to

## Spiræa Japonica—In Clumps. Fall Delivery.

The graceful sprays of this plant, covered with fine white feathery blossoms, are very useful as cut-flowers, for Basket and Bouquet work, but as a Spring Plant this ranks among the most important for Easter sales. Besides it is hardy and does credit to any garden. We offer fine clumps:

In original boxes of 100, at	\$5 50 the box.
In boxes of 50 only, at	3 30 "
By the thousand, at	50 00 the 1000.

## Spiræa Compacta Multiflora.—Fall Delivery.

Is a decided improvement on the old Japonica, but the stock is as yet very limited abroad, and we can offer it only by the

100 clumps	, at	 	 													 \$11	5	60
The dozen.																	5	

## Lilium Harrisii—The Bermuda Easter Lily. Now Ready.

Much earlier than the old Longiflorum variety; can be flowered for Christmas and earlier. The smallest bulbs are preferred for the earlier cut-flower growing, producing less flowers, but longer flower stems. The larger bulbs are preferred for pot-plant growing. We offer in three sizes, stock from the most reliable growers only:

			Per 1000	Per 100
A-5 to 7 in.	circumference of	bulbs	\$27 00	\$3 00
B-7 to 9 in.		"	PP 00	6 00
C-9 to 11 in.	"	***		12 00

Keep the fly off the growing buds in all stages, else you will loose or spoil them.

## Rhododendron Plants.—Fall Delivery.

These are getting annually more popular for the Easter trade. We import the little bushes from Belgium, covered with 8 to 12 and more sets of buds. They force easily into flower for the coming Spring, and with their bright colors of pink, crimson, scarlet, blush and white, make a very rich show. To secure a nice stock for timely fall delivery importation orders should be given at once, as we do not carry stock of these in this country. The cost of nice plants in boxes of assorted colors, holding 25 to 50 plants, is 40 cts., 50 cts., 75 cts., and \$1.00 each plant, according to size.

## Azalea Indica Plants.—Fall Delivery.

No better plant exists for Spring and Easter sale. Its lovely delicate colored and beautifully shaped flowers have made it the favorite of the public. Thousands of plants are imported annually, of which we supply a fair share. With proper treatment failure is hardly possible, and the return on the investment averages a good profit. The main part of our sales are made in the spring for fall delivery, but for those who delayed ordering in time, and still wish to supply themselves from our much prized stock, we have secured a limited quantity of finely grown little plants which we offer by the original box of fifty plants, in the following very desirable assortment:

- 5 Deutsche Perle, double, purest white.
- 5 Rafael, double, white.
- 5 Vervæneanum, largest flowering, double, pink and white.
- 5 Empress of India, double, pink, white bordered.
- 5 Sigismund Rucker, similar.
- 5 Emperor of Brazil, double, rosy, bordered white.
- 5 Simon Mardner, double, pink, large flowering.
- 5 Dr. Moore, double, bright deep pink.
- 10 Mad. Van der Cruysen, double, bright crimson.

In all fifty plants, these we can offer in two grades:

Early ordering is advised to secure this stock.

### Other Bulbous Plants.

See the following chapters.

To those who wish to procure earthen pans for growing bulbous stuff as previously mentioned, we can recommend, our special make, manufactured to fit our extra deep metal Jardiniere or Fern Dish, of embossed metal, in nickel, copper-bronze and silver-plated finish, quoted below.

Each Metal Jardiniere should help to sell many a flowering pan of bulbs, as it serves to hide the plain looks of the earthen pan, which latter is again interchangeable in rotation as the different pans may come into flower, by means of a metal clasp furnished with each Jardiniere. This combination should prove a very pleasing and acceptable decoration for every home. We can furnish the

metal Jardiniere—		-Diam.	of Pans—
including clasp and one earthen pan,		7 in.	8 in.
in nickel or copper-bronze finish	for	\$1 50	\$1 75 each.
in silver-plated finish	46	1 85	2 15 "
Special Earthen Pans-Round,		7 in.	8 in.
to fit these Jardinieres	at per 100,	\$9 00	\$13 50
	" doz.	, 1 20	1 80

# Dutch Hyacinths.

This most beautiful Winter or early Spring flowering Bulb is very easy to grow if properly attended. 5 inch pots are best chosen for single bulbs, and rich soil mixed with a little sand; five to six in an 8 inch pan will make a good show, but then it is best to take all of one kind, or only such varieties as will flower together. Out doors any good garden soil will answer. Plant 4 to 6 inches deep, and 8 to 10 inches apart. Sunny exposure is preferred, and slight protection during the winter months.

For best results we recommend our Superfine Mixtures and the named sorts but for those who desire a smaller outlay, we keep the cheaper mixtures, which will

give satisfaction in proportion to their cost. We offer:

#### In Mixtures.

A—Bedding Mixture. Suitable only for bedding out. The regular Dutch mixture as put up abroad from red, white, and blue colors, mixed.

Colors, Innica:		
	Per 1000	Per 100

#### E-Exhibition Hyacinths in Collections.

For all who wish to compete at Spring shows, or to have an extra fine flowering strain of Hyacinths, we offer the following collections:

No. 1—One dozen bulbs, in 12 distinct named sorts of red, white, blue and yellow, one qua	art	er
double flowering the collection \$	ß1 !	50
No 9—Two dozen hulbs in 12 distinct named sorts as before	2 !	50

4 00

No. 3—Four dozen bulbs, in 24 distinct named sorts, of red, white, blue and yellow, single and double flowering.

#### F-Fine Named Sorts.

The Single ones are generally more effective in flowering than the Double ones. All Hyacinths usually do better in pots than on glasses; for the latter purpose choose the heaviest bulbs and remove all offsets.

# Tulips.

SINGLE TULIP.

With their bright colors are indispensable in bedding where a show of early Spring flowers is desired, and for pot-culture indoors nearly all the leading varieties may be recommended. Their treatment is similar to that of Hyacinths. As a cut flower they are mostly grown in flats and come very handy in the general assortment of Winter flowers. The most suitable varieties for this purpose are printed in heavy type, but do not try to force Tulips unless they be thoroughly rooted. The greatest effect is shown where ten or twelve of a solid color are grown in an 8 inch pan, thus they make a beautiful show for window or room decoration. Such pans can be produced at moderate cost and will prove ready sellers during the dreary winter days. If properly handled a succession of flowers can be had from middle of January forward until Easter and later. The earliest varieties are marked with a \*

#### Crocus.

One of the earliest Spring flowers, peeping with its bright golden and purple hues often through the white covering of a March snow. The flowers do not last long, but there is quite a succession of bloom, extending the flowering time materially. Plant in the fall about 3 inches deep, 2 inches apart in solid beds or borders, or scatter in the lawn. Being quite hardy they may remain undisturbed for years. Their cost is but trifling; we offer:

Mixed Colors.	 Per 1000 \$2 40	\$0 30
White Mixture	 2 50	30
Blue "	 2 50	30
Purple	 2 50	30

Lord Fielding, striped 50	1	0 Mammoth Yellow, top roots	90	15

Our Superfine Mixture from these sorts, showing fine large bulbs, at \$4.50 per 1000; 50 cts. per 100.

#### Narcissus.

These are all hardy, only the Polyanthus varieties needing a protection during winter time in our climate, they do very well though, when grown in pots or pans. The other Narcissus kinds will all answer for pot growing as well as out-door planting, the best and most popular kinds have been quoted already in the first chapter of this list. We repeat the full'line hereafter.

#### Miscellaneous Bulbs-Continued.

	per 100	per doz.
Scilla Sibirica or Amoena, (Blue Squill)	\$0 60	\$0 10
A Standard Comments of the Com	-	

After the Crocus are done the blue Squills will appear, throwing their graceful trusses about 6 inches above the ground and remaining in bloom for quite a while. It is the truest blue amongst all the bulbs, and the effect if massed in beds is most pleasing. The little bulb is quite hardy and need not be taken up at all. It will get along in any garden soil. Plant in the fall about 2 in. or 3 in. deep. Grown indoors in pots or pans they show very ornamental when in flower. Solid pots or pans of Snowdrops or of Grape Hyacinths (Muscari botroides alba and Coerulea) show to equal advantage.

# Neponset Paper Flower Pots.

MANUFACTURED SOLELY BY

#### F. W. BIRD & SON.

From their Celebrated Neponset Waterproof Fabrics.

A0 F0

These Pots have proved quite successful for growing Hyacinths, Tulips and Narcissus indoors. They retain moisture better than the earthen pots and are a safeguard against any neglect in watering. Plunged in damp cocoanut fibre during the rooting period, they come out clean and strong when the bulbs have to be brought to light. They are pleasant to handle, do not break, and can be shipped for little money by Express or Mail, as their weight is but trifling. Every Dealer in Dry Bulbs should have these for sale. Every household should keep a little assortment on hand, ready for a moment's use. They nest closely and come

#### Cocoanut Fibre Refuse.

This article is used extensively by every private conservatory and the majority of florists in England, where its merits are fully understood. It combines warmth and cleanliness with deodorizing properties, holds moisture in heat and heat in cold weather. On the greenhouse bench it is invaluable for potting, plunging and forcing. Outdoors it is the best material for mulching between bedding plants, strawberries, bulbs, and the like. It excels by its cleanliness.

All Fertilizers sold for Net Spot Cash only.

Hyacinth Glasses.—We pack carefully but assume no risk of breakage. Either high or low (Tye) shape, assorted in three colors, \$1.25 per dozen. Packing and cartage charged, if ordered alone.

Natural Willow Pots and Pans to be filled with soil and Swamp Moss, for growing assorted bulbous stuff.

This is done in Europe with good effect. The brownish natural willow being tough, stands the roughest handling and produces a rustic appearance in fine contrast to the rich effect of the flowering bulbs. They can be used with effect to set on the table, in the window, on the veranda, on the lawn, or wherever a decorative charm is wanted.

We shall have these in different sizes, but as the invoice has not yet arrived, we must refer to special correspondence for quotations.

We expect these Natural Willow Pots and Pans to become quite a feature for our country, as they will be equally well adapted for the growing of Spring and Summer-flowering and Foliage Plants, Ferns and the like.

- Our Bulb Guide, with directions how to grow successfully bulbs under glass or outdoors, furnished gratis to our patrons. Duplicate copies can be procured for 10 cts. each.
- C. L. Allen's latest work on Bulbs and Tuberous Rooted Plants, for sale by us. Mailed postage paid on receipt of \$2.00.

#### Grass Seeds.

We furnish in good reliable quality at market prices:

Blue Grass,

#### Red-Top Grass,

Rye Grass,

Timothy.

Permanent Pasture. Our special mixture, furnished at \$16 00 per 100 lbs.

Lawn Grass Seed. Our Central Park mixture, furnished at \$3 00 per bushel; \$16 00 per 100 lbs.

Net Spot Cash. Bags and cartage charged extra.

#### PLANTS OF

# Laurus Nobilis or Sweet Bay Laurel

#### IMPORTED TO ORDER.

Hardy in not too severe climates. This excellent ornamental tree, used in Europe wherever decorations are made, will prove, when fairly known, a welcome addition to our list of foliage plants. Its abundant glossy foliage, trained into crowns or pyramidal shapes, withstands 28 degrees Fahrenheit, and a great deal more knocking about in the decoration of stages, halls, hotels, verandas, winter gardens, etc., than Palms and other tender plants. We sell them, tub included.

#### MUSHROOM SPAWN.

Furnished at market prices.

PLEASE NOTE.—We have added to the leading sorts of Bulbs short directions how to treat them to obtain success, believing that to many who retail Bulbs this will prove an agreeable help. For more detailed directions we refer again to our Bulb Guide, mailed free to our patrons; duplicate copies of which can be had for 10 cents. This Guide gives also useful information on the treatment of Roses, Azaleas, Primula, and other seeds, etc.

# Hardy Perennial Plants

Are growing daily into more importance to the landscape florist as well as to the grower of decorative stuff. We have concluded arrangements with the well reputed firm of

### Goos & Koenemann, Nieder-Walluf, Germany,

to represent them in this country as agents for the taking of orders and for the delivery of their products. Their new Trade Price List will soon be ready and mailed to applicants. Among many other items of interest, we call attention to their fine line of

Anemones, Asters, Coreopsis, Delphinium,
Gaillardia, Heuchera, Iris, Poppies, Phlox,
Primula, Spirea, Cactus Dahlia, Clematis, etc.

Of all Insecticides thus far introduced, we claim the highest merit for

# Hughes' Soluble Fir Tree Oil,

now largely used and recommended by many as the best and surest of all.

We are the General Wholesale Depot for the United States and Canada. Prices are:

One Gallon tins, - - - - \$3.25 each.
One Quart tins, - - - - 1.00 "

SEE THAT EACH PACKAGE SHOWS THE TRADE MARK.

We have secured the American Agency for

# Fenster Pappe,

A new German substitute for covering cold frames, etc., in place of glass, is very strong and durable, and sufficiently translucent for all plant life, besides a good protection against light frosts. Not affected by the changes of the elements; does not shrink like parchment paper. Endorsed by German and Dutch growers and nurserymen. Comes in rolls, 36 inches wide and about 110 yards long.

Price per Original Roll, \$9.00.-F. O. B. Cars N. Y.

DIRECTIONS.—Stretch and nail on to the sash bars, then saturate thoroughly with linseed oil. Varnish when dry, and your unbreakable sash is ready.

We solicit a Trial.
